X	Other Reasons

ILLNESS

In cases of injury to, or sudden illness of, a student, school employee or visitor, the responsibility of the Brick Township Board of Education and its personnel lies in giving emergency care and first aid until medical help can be obtained if necessary.

When students are taken suddenly ill in school, they shall be sent or escorted to the nurse's office. If the nurse is not in the medical office, the student shall be sent or taken to the building principal's office. In general, the same procedures that apply to accidents shall apply to sudden student illness. The superintendent, in cooperation with the medical inspector, shall implement this policy.

Control of Contagious Diseases or Conditions

In order to protect the health of the students in our schools, all regulations of the state department of education, the state department of health and the local board of health shall be scrupulously observed, particularly those dealing with contagious or infectious diseases or conditions. Students who have been absent because of contagious or infectious diseases or conditions must present a certificate of recovery from a licensed physician or be examined by the medical inspector.

The school nurse shall observe students who show evidence of communicable disease and recommend their exclusion to the school principal. Recommendations shall be consistent with reporting requirements on communicable diseases as set forth in the New Jersey Health Code. Such students shall be isolated in the nurse's office until a parent/guardian picks them up, and any necessary measures have been taken to prevent spread of the infection. The school nurse, under the direction of the medical inspector, shall instruct all teachers in the symptoms of the most common diseases or conditions at least once a year.

Any student with HIV infection or AIDS or who lives with or is related to someone with HIV or AIDS shall not be excluded from general education, transportation services, extracurricular activities, athletic activities, assigned to home instruction or classified as eligible for special education because of the HIV infection. The school nurse shall recommend the exclusion of any individual with weeping skin lesions that cannot be covered.

In addition to the review of health and safety measures required by law, the school nurse shall individually instruct teachers from whose classrooms a student has been excluded in the symptoms of the disease for which the student was excluded. Student rights and confidentiality shall be protected in accordance with law. No teacher shall attempt to diagnose any illness of a student, but shall refer suspected cases to the nurse immediately.

Handling Blood and Body Fluids

The superintendent and medical inspector shall develop detailed routine procedures based on New Jersey administrative code and guidelines from the Centers for Disease Control for proper handling of blood and body fluids resulting from illness/accidents in the schools. These procedures shall be disseminated to all district staff and volunteers.

The medical inspector shall report all cases of communicable disease to the local board of health as required by law.
