

Agreement with Nonpublic Schools Regarding NJDOE Technology Initiative

September 18, 2018

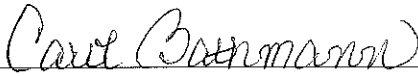

The Brick Township Board of Education agrees to implement the Nonpublic School Technology Initiative for the SY2018-2019 with the nonpublic schools in its geographical boundaries.

In accordance with the initiative, Brick Township Public Schools will not reimburse the nonpublic school directly. The Board will create purchase orders for the technology requested by the nonpublic schools. The technology will be delivered to the Brick Township Public Schools, inventoried, and tagged. All technology is purchased with a year service agreement. It is then distributed to the nonpublic school.
